-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1722

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Roberts (U.S. Pat. No. 2,912,723).

Roberts discloses a forming structure. In the embodiment depicted in Fig. 6, the structure includes a first portion including plate 87 comprising a network of interconnecting members defining a plurality of apertures. A second portion is on the right side of plate 81 includes no apertures, and thus has a zero percent open area. The third portion from the center of plate 81 to plate 87 joins the first and second portions, with a second percent open area that is less than open area of the first portion (see Fig. 6).

3. Claim 1 is allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1722

The prior art of record fails to teach or suggest a forming structure with the combination of features defined in claim 1 of the instant application. The closest prior art disclosed is disclosed by Roberts (described above) or Banks (U.S. Pat. No. 3,518,726). Roberts fails to teach a forming structure being cylindrically tubular. Banks also discloses a forming structure, which includes portions with differing amounts of open area (see Figs. 4 and 15) placed on a tubular structure. Banks fails to teach however, the portions themselves to be cylindrical, instead the portions are segments across the tubular structure (see Figs. 1-3). Moreover, there is no suggestion in either Banks or Roberts, or the other prior art of record of the modification of the disclosed devices to create a forming structure with the complete combination of features defined in claim 1.
